When you've invested in
quality machinery for your
production unit, getting a
return on your investment is a
dream come true. Investing in
quality tooling is the fastest
way of achieving that! Instead
of throwing your tools away
after every job, get some
decent tools and make them
work for you. Give your
machines the love they
deserve! After all, you
wouldn't put cheap tyres on a
supercar would you?

The cost of tooling usually
represents only 2% of the
overall cost of your product.
Whereas, machine time can be
as much as 20%. Decent tools
can reduce machine time
dramatically.

PCD

Arrow Diamond Tooling LTD, offers a unique range of high performance polycrystalline diamond tooling for any industry. If you want performance, power, speed and endurance, there are no better tools on the market. We are unrivalled in any situation.

All tools are precision made from the highest grades of materials. They are designed to resist the most abrasive materials on the planet! Each tool is balanced to G2.5 and capable of the maximum rotational speeds. Radial accuracy is literally at the centre of everything. The most modern production methods are used to ensure you get the best. The highest standards are maintained to guarantee you get the best performance.

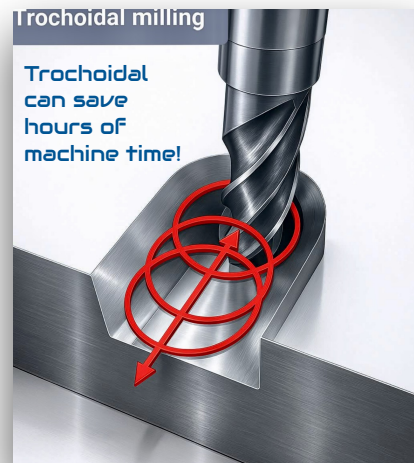

OUR TOOLS ARE THE BEST VALUE FOR MONEY TOOLS YOU CAN BUY!

SOLID CARBIDE

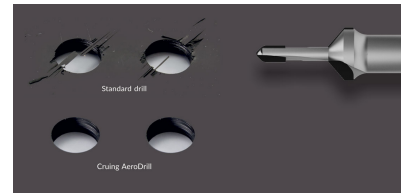

Our solid carbide tooling has ground breaking geometry and features that make them capable of handling the most challenging of tasks, with the most difficult materials. It's no surprise they revel in the exotic! A complete range of high tech, beautifully applied coatings are available on request.

Cooling slots on even the smallest drills are a lifesaver. Our unmatched performance and precision, will enhance any machine you put them on. G2.5 balance and the highest accuracy shanks, couple with, the best quality solid carbide available, give stunning results you can rely on. If "lights out" machining is the order of the day, you need tools that will not fail!

BESPOKE

One of our specialities is the design and manufacture of extreme bespoke tooling. No problem we have ever faced, hasn't been overcome. Over the last 60 years many major worldwide manufacturers have relied on Cruing tools and ingenuity to solve their production problems. In many cases, our competitors have both tried and failed! A unique blend of skill, Endeavour and dogged determination has always lead to a solution.

SERVICE

We have a full-service program that is the best on the market. We will return your tools in some cases, even better than when they were new. We can service almost any tool you have.

SPARES

We have a range of spares supplies at our fingertips. All parts SCM machines both old and new. vac pump spares including Bearings, lubricants and vanes for all brands. Our prices for vac pump vanes are exceptionally good. We can also supply cutting teeth for most hoggers and shredders.

Our tooling lets you join the elite group of manufacturers who know that 'value for money' doesn't mean 'cheapest'.
